Leetcode

Summary

Computer Science graduate with internship experience at **DRDO** and **MindMatrix**, working across **workflow automation**, **full-stack development**, and **applied AI**. I enjoy taking a problem from idea to working product, whether that's a tool that eliminates hours of manual effort or a **RAG** pipeline that makes sense of unstructured data. Backed by solid fundamentals in **DSA**, **OOP**, and **system design**.

Education

JSS Academy of Technical Education

Bachelor of Engineering in Computer Science — CGPA: 8.69

Bengaluru, Karnataka

Oct 2022 – Jun 2026

Geetanjali Olympiad School

Pre-University (11th & 12th)

Bengaluru, Karnataka

Jun 2020 – Jul 2022

Internships

Android Developer Intern — Madhu-Marga: AI-Powered Beekeeping App

Feb 2026 – Jun 2026

MindMatrix, Bengaluru

- Built **Madhu-Marga**, a smart beekeeping Android app in **Kotlin** (Jetpack Compose, MVVM, Room) covering hive registration, inspection logs, harvest tracking, and smart colony-health alerts.
- Designed the **AI Hive Doctor**, a rule-based diagnostic engine that turns inspection inputs into a colony health score, risk classification, and actionable recommendations for beekeepers.

SDE Intern — Automation of HILS Framework: A Web-Based Approach

Sept. 2025 – Oct. 2025

Aeronautical Development Establishment (ADE) – DRDO, Bengaluru

- Developed a Python-based web app automating **RT-LAB** hardware-in-the-loop simulation workflows (Load, Build, Execute, Stop, Reset) with real-time testing, **cutting manual effort by 70%**.
- Added **MATLAB** script management with secure authentication, file upload, and syntax validation while modernizing legacy infrastructure (Python 2.6.4, MATLAB R2012B).

Projects

AI Resume Analyzer & LinkedIn Job Scraper — Python, LangChain, FAISS, RAG, Selenium

2025 – 2026

- Built a resume analysis system using **RAG** (LangChain + FAISS + OpenAI GPT) that evaluates resumes, generates personalized feedback, and recommends suitable job roles.
- Engineered a semantic search and LinkedIn scraping pipeline (FAISS, Selenium) to retrieve relevant postings and job descriptions, streamlining job discovery.

Banking Application with Face Recognition — MongoDB, Express.js, React.js, Node.js

2024 – 2025

- Developed a full-stack **MERN** banking application with face-recognition-based authentication as an additional security factor for login and transactions.
- Implemented secure REST APIs, session handling, and core banking workflows backed by MongoDB.

Q-Secure Chat — Python, JavaScript, Flask

2023 – 2024

- Implemented an end-to-end encrypted messaging client using **post-quantum cryptography**, built to resist future quantum attacks.
- Evaluated and demonstrated multiple quantum-safe alternatives to RSA for long-term secure communication.

Technical Skills

Languages: Java, Python, Kotlin, C/C++, JavaScript, SQL, Go, TypeScript

Frameworks: React.js, Node.js, Express.js, Flask, Jetpack Compose (MVVM, Room)

Generative AI: LangChain, RAG, FAISS, OpenAI API, Prompt Engineering

Databases & Tools: MySQL, MongoDB, Git, GitHub, Android Studio, Linux, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
